The election filed July 6, 2005 has been entered and made of record as paper no. 0705.

Applicant's election of claims 1-5 in the reply filed on July 6, 2005 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Katti et al (US-5,375,082).

Katti discloses a storage medium comprising a substrate (12), a magnetic layer (26), and means of selectively introducing a plurality of nucleation sites (28) into the magnetic layer in which the nucleation sites represent the information to be stored. Note lines 40-53 of column 5 of Katti et al.

In re claims 3 and 4, no patentable weight is given to the process of making the nucleation sites in claims drawn to the product. A "product by process" claim is directed to the product per se, no matter how actually made, In re Hirao, 190 USPQ 15 at 17(footnote 3). See also In re Brown, 173 USPQ 685; In re Luck, 177 USPQ 523; In re Fessmann, 180 USPQ 324; In re Avery, 186 USPQ 161; In re Wertheim, 191 USPQ 90 (209 USPQ 554 does not deal with this issue); In re Marosi et al, 218 USPQ 289; and

particularly In re Thorpe, 227 USPQ 964, all of which make it clear that it is the patentability of the final product per se which must be determined in a "product by process" claim, and not the patentability of the process, and that an old or obvious product produced by a new method is not patentable as a product, whether claimed in "product by process" claims or not. Note that applicant has the burden of proof in such cases, as the above caselaw makes clear.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Katti et al in view of Almasi et al (US-3,680,065).

Katti discloses all the subject matter discussed above; however Katti does not teach the magnetic layer being a magneto-optical thin film. Almasi teaches that the magnetic layer can be magneto-optical thin film in magneto-optical memory element. Therefore, it would have been obvious to one of ordinary skill in the art to use the teachings of Almasi to form a magneto-optical memory element in Katti's storage medium.

The other references are cited to show other structures pertinent to Applicant's disclosure.
